

# INDEX

- Alaska, SE.  
forests, 335-336  
muskegs, 337, 344  
physiography, 331-332  
pollen profiles, 331-350  
vegetation, 335-337
- Alpine biotic communities of Uinta Mountains, 93-120
- Aspection, in alpine communities, 108-109
- Bard, Gily E., article, 195-215
- Biological spectrum, 188
- Brown, R. T., article, 217-234
- Bryden, Robert R., article, 45-68
- Carpenter, Charles C., article, 235-258
- Climate  
central Iowa, 287, 291  
Medicine Bow Mts., Wyo., 78  
northern Wisconsin, 218  
Oahu, 155  
postglacial, 348  
southeastern Alaska, 335
- Community classification  
concepts, 302-304  
applications of, 319-323
- Comparative ecology of garter snakes in mixed populations, 235-258
- Conifer-hardwood forests, N. Wise., 217-233  
composition, 220  
soils, 225-226  
vegetational history, 219
- Curtis, J. T., article, 217-234
- Daubenmire, R., article, 301-330
- Distribution  
of foliage insects, 7-14  
factors affecting, 56  
patterns in finches, 133
- Dry forests of Oahu, T. H., 153-166  
environment, 154-156  
types, 156-159  
past distribution, 163  
development, 160-162  
species, 166-168
- Ecology of *Pelmatohydra oligactis*, 45-68
- Engelmann spruce, autecology, 73-76
- Environment  
Linn County, Ore., 188-191  
of alpine biotic communities, 99-108  
of Oahu forests, 154-156  
relation of mice to, 271
- Food  
of insects, 24  
factor in distribution, 59  
garter snakes, 238-244
- Forest classification  
applications, 324-326  
concepts, 302-303, 319-323
- Forest continuum, Wise., 227-229
- Harwood forest, central Iowa, 283-297  
climate, 287, 291  
related studies, 283-284  
soils, 291-293
- Hayward, C. Lynn, article, 93-120
- Heusser, C. J., article, 331-352
- Home Range, 246
- Jackson, William B., article, 259-281
- Kucera, C. L., article, 283-299
- Krummholz, 107-108
- Lava flows, Linn Co., Ore., 169-193  
climate, 172  
geology, 170-171  
plant communities, 174-188  
synusia, 175-188
- Life form spectra, 199
- Medicine Bow Mts., Wyo., 69-91  
climate, 78  
fire, 79  
geological features, 78  
soils, 79  
virgin forest, 76-90
- Microclimate, 189
- Muskeg, 337, 339-343  
development and forest succession, 344-346
- Oahu, T. H.  
climate, 155-166  
native dry forests, 153-166
- Oosting, H. J., article, 69-91
- Phytosociology  
Idaho forests, 302-319  
Nash Crater lava flows, 174-193  
Spruce-fir forest, Wyo., 69-91
- Pollen profiles, SE. Alaska, 331-352
- Populations  
dynamics of, 62  
garter snakes, 251  
of the wood mouse subjected to DDT and Parathion, 259-281  
wood mouse, 263-270
- Postglacial succession, Alaska, 344-346  
chronology, 348  
climate, 348
- Reed, J. F., article, 69-91
- Relation of metabolism to climate and distribution in finches, 121-152
- Reproduction  
of garter snakes, 253  
of Pika, 111  
rate in Hydra, 62
- Roach, A. W., article, 169-193
- Roots, in old fields, 197, 210
- Salt, George W., article, 121-152
- Soil  
Iowa hardwoods, 287, 293  
lava flows, 189  
moisture variations, 291-292  
northern Wisconsin, 220-224  
Oahu, 156  
Piedmont, N. J., 206-207, 209-210
- Subalpine fir, autecology, 73-76
- Subalpine forest, Rocky Mts., 69-73
- Summer foliage insect communities, 1-44
- Uinta Mts., Utah  
alpine communities, 99-119  
physical features, 94-98
- Virgin forest, phytosociology, 76-90
- Whittaker, R. H., article, 1-44
- Zonation, Oahu, 154
